We are an innovative team of automotive enthusiasts and blockchain technology experts who have come together to create an automobile-based crypto token. Our mission is to revolutionize the automotive industry by leveraging the power of blockchain and cryptocurrency to enhance various aspects of the sector.
Our token aims to bridge the gap between traditional automotive systems and the emerging world of blockchain technology. We believe that blockchain technology can bring transparency, efficiency, and security to the automotive ecosystem, benefiting both consumers and industry participants.

Mission:

Our mission is to create a decentralized ecosystem that enhances the automotive industry, bringing transparency, security, and efficiency to various aspects of the sector, including car manufacturing, ownership, maintenance, and mobility services. By leveraging blockchain technology, we aim to provide users with a seamless and trustworthy experience while unlocking new possibilities within the automotive world.

Here are some key points about our project:

1. Token Utility: Our crypto token serves as a means of value exchange within the automotive ecosystem. It can be used for various purposes such as purchasing vehicles, auto parts, services, and even insurance. Additionally, token holders may enjoy exclusive benefits, discounts, and rewards within our partner network.

2. Decentralized Marketplace: We are developing a decentralized marketplace where individuals and businesses can buy and sell vehicles, parts, and services directly using our token. This peer-to-peer platform eliminates intermediaries, reduces costs, and facilitates seamless transactions.

3. Car Maintenance and Service: Our platform provides a streamlined approach to car maintenance and service. Users can find trusted service providers within the network and pay for their services using our crypto token. Additionally, all service records and

maintenance history are stored on the blockchain, ensuring transparency and facilitating future transactions.

4.   Vehicle Data Security: We prioritize the security and privacy of vehicle data. By utilizing blockchain technology, we enable secure storage and sharing of data, ensuring that only authorized entities can access and utilize the information. This helps protect sensitive data such as ownership records, maintenance history, and vehicle diagnostics.

5.   Supply Chain Transparency: Our project aims to enhance transparency in the automotive supply chain. Through blockchain-based tracking and verification, we enable consumers to trace the origins and history of parts and components used in their vehicles, promoting trust and accountability.

6.   Community-Driven Development: We believe in the power of community and actively involve our token holders in the decision-making process. Through governance mechanisms, token holders can propose and vote on important project initiatives, fostering a sense of ownership and collaboration.

7.   Environmental Initiatives: We are committed to sustainability and environmental responsibility. Our project supports initiatives such as electric vehicles, renewable energy adoption, and eco-friendly manufacturing practices. By promoting green solutions, we aim to contribute to a cleaner and greener future.

8.   Partnerships and Integration: We strive to collaborate with expertise in automotive engineering, blockchain development, finance, and marketing to expand the reach and impact of our ecosystem. By integrating with established industry players, We are passionate about leveraging technology to drive positive change in the automotive industry and provide value to our token holders

Road Map

Year 1: 2023

- Establish a strong online presence and build brand awareness through digital marketing and social media campaigns

- Develop partnerships with suppliers and manufacturers of automobile spare parts to ensure a wide range of products are available on the platform
- Offer attractive discounts and promotions to incentivize buyers and sellers to use the platform

Year 2: 2024

- Expand the product range to include accessories, lubricants, and other automotive products
- Launch a mobile app to increase accessibility and convenience for customers
- Develop a customer loyalty program to retain existing customers and incentivize repeat purchases

Year 3: 2025

- Introduce financing options to enable customers to purchase high-value products on the platform
- Launch a B2B platform to cater to the needs of garages, service centers, and other businesses in the automobile industry
- Expand the supplier network to include international manufacturers and suppliers

Year 4: 2025

- Launch an offline store or a franchise model to establish a physical presence and increase customer trust and loyalty
- Launch a referral program to encourage customers to refer their friends and family to the platform
- Collaborate with insurance companies to offer bundled packages of automobile insurance and spare parts purchases

Year 5: 2026

- Explore opportunities to offer value-added services such as installation, maintenance, and repair services
- Expand to other countries in the region to capture a wider market share
- Conduct market research and analysis to identify emerging trends and technologies in the automobile industry and adapt the platform accordingly.
- Overall, this market penetration plan for Gudne aims to establish a strong and sustainable presence in the Asian automobile market by leveraging the platform's strengths and catering to the evolving needs of customers in the industry.

Token Nomics

Total Supply	1,000,000,000.00
Project Name	Velocity Automobile
Ticker	$VELO
Token Type	Governance and UtilityToken
Seed	10%
Private	10%
Team & Advisors	10%
Public	5%
Operations and Treasury	25%
Suppliers and Users	20%
Community & Marketing	20%
